PROFILE

Full-stack developer with 8+ years across web and mobile, including 4 years in the UAE. Rebuilt a Dubai distributor's corporate site as a Next.js 14 application (32 statically generated routes) and led a zero-downtime hosting migration to Vercel. Ships custom Shopify OS 2.0 themes and headless storefronts for UAE brands. Former Android/Flutter developer with published Google Play apps. Early adopter of AI-assisted engineering (Claude Code, MCP).

WORK EXPERIENCE

AK International LLC (AKI) — Dubai, UAE

2022 - Present

Web Developer & SEO Specialist

- Rebuilt corporate website (akiuae.com) as a Next.js 14 app with 32 statically generated routes, improving load performance and Core Web Vitals
- Led zero-downtime DNS & hosting migration from GoDaddy to Vercel, preserving Microsoft 365 email records with no interruption
- Drove technical, on-page and off-page SEO; grew organic traffic and rankings tracked via GA4 and Search Console
- Administer email systems (Microsoft 365, Google Workspace, cPanel), domains, SSL and hosting; own security, backups and DR readiness

Independent eCommerce & Web Projects — Dubai

2023 - Present

Full-Stack Developer (concurrent)

- Designed and shipped a custom Shopify OS 2.0 theme for Esthica.com (UAE beauty store) with full catalog integration
- Built a Next.js headless storefront for Beatryx with checkout integrated into the Esthica Shopify backend
- Developed a Next.js content platform for Flavor & Figures, a Dubai food media channel
- Integrated MCP connectors (GitHub, Figma, Vercel) into an AI-assisted development workflow

ArhamTechMind — Remote / India

2020 - 2022

Android & Flutter Developer

- Developed and published Android apps (Java, Flutter) on Google Play, including Islamic utility apps for international users
- Migrated legacy Java apps to Flutter with Firebase Realtime Database, Auth and Analytics
- Drove testing and debugging cycles that improved stability and responsiveness

csdevbin — Hyderabad, India

2017 - 2019

Android Developer

- Built and maintained native Android apps in Java within an agile delivery team, shipping high-quality mobile modules on schedule
